John Barsigo

A certified full-stack developer focusing on back-end development with the ability to create scalable and efficient applications.

I specialize in Flask and React frameworks and have experience in building REST APIs, authentication systems and database-driven applications as well.

I am able to work with various technologies and frameworks to build robust solutions. It is also in my skill set to develop the front-end and successfully integrate it with the back-end using modern techniques.

Work Experience

Old Kachesa Suites | Nakuru Kenya

Database Administrator — Jan.2022 - Jun.2025

- Generated reports from database queries to support operational decision-making.
- Designed the database through ERDs to develop tables, relationships and constraints.
- Automated generation of billings and payments and by extension tenant arrears.
- Designed an inventory management system to digitize the tenant onboarding, data entry and management processes such as automatic billings and payment recording.
- Managed and maintained relational databases to ensure reliability, performance and data integrity and accuracy - through validation, cleaning and consistency checks.
- Configured database user roles and permissions to maintain secure access control.
- Optimized queries to improve database performance and reduce response time.
- Performed regular database backups to prevent data loss.

Tools: PostgreSQL, JWT, Flask

Tovuty Technologies | Nairobi Kenya

Social Media Manager

Jan.2023 - Apr.2023

- Created and scheduled engaging content across social media platforms.
- Designed simple graphics and edited videos to support digital content.
- Maintained organized content calendars - ensured timely posting and content updates.
- Engaged with followers to build online community presence - responded to comments, messages and audience inquiries.
- Monitored engagement metrics such as reach, impressions, interactions and reported on performance insights using platform analytics tools.
- Identified content trends, adjusted strategy accordingly and reported on performance insights using platform analytics tools.

- Applied SEO principles to improve content visibility
- Researched competitor trends and industry best practices.
